Serving Californians Since 1929

Ball Plant: Iron and Manganese Treatment

What	Add iron and manganese treatment facilities at Ball Plant
When	Plant modification work is scheduled to occur from May 2022 through November 2022 – Monday through Friday – between 8:00 AM and 5:00 PM.
Where	5772 Ball Road in Cypress, California.
What to Expect	Construction crews with backhoes, dump trucks, crew trucks will be working in and around the plant site. Contractor will be modifying the existing wellhead piping and treatment process to include a filtration process for removal of iron and manganese. During the phases of construction, you will hear general construction noise and heavy equipment operating during normal business hours. The streets will remain open to traffic during the construction period. The construction crews will make every effort to keep dust to a minimum. Please expect an increased level of noise during the construction period. Weekly activities such as trash pick up will not be interrupted.
Contacts	If you have any questions or concerns about the construction activities for this project, please call the Golden State Water Company's Project Engineer, Ms. Theresa Wu at (714) 308-8496. Please visit our website at https://www.gswater.com/los-alamitos/infrastructure-projects/ for periodic updates on the construction progress.
