

More than \$2.5 Million scheduled to be invested in Placentia

Golden State Water is committed to responsibly maintaining the local water infrastructure to ensure we can continue providing customers with premium water service. These investments protect the safety and reliability of the local water system.

Benefit to Customers

Below are two of the major projects planned for the Placentia Customer Service Area in 2022. For additional project details, please visit www.GSWater.com/Placentia.

Project Name: Greenbrier AMR

Construction Summary Construction crews will work to install approximately 3,300 L.F of 8-inch & 12-inch PVC to replace the existing old 4-inch pipes, 2 pressure control valve stations, 5 new wet barrel fire hydrants & 30 domestic services.

Project Rational This project is required to provide reliability of service to local customers by abandon existing old pipelines that anticipate to reach the end of the useful life.

Working Hours Monday through Friday | 8 a.m. – 4 p.m.

Anticipated Project Timeline June 2022 through December 2022

Project Name: Bent Tree AMR

Construction Summary Construction crews will work to install approximately 1,800 L.F of 8-inch to replace the existing old 4-inch pipes, 3 new wet barrel fire hydrants & 17 domestic services.

Project Rational This project is required to ensure providing reliability of service to local customers by abandon existing old pipelines that anticipate to reach the end of the useful life.

Working Hours Monday through Friday | 8 a.m. – 4 p.m.

Anticipated Project Timeline March 2022 through July 2022

Companywide, an investment of more than \$18 million to replace old meters, services, safety equipment, etc. will be made throughout GSWC service areas. This investment is critical to protect the quality and reliability of water service.

Golden State Water also remains focused on investing to modernize the customer service experience with improved online and account management resources.
