

Serving Californians Since 1929

CONSTRUCTION NOTICE

Installation of New Water Mains

What	Replacement of existing steel mains with new 8" & 12" PVC mains, and installation of new water services and fire hydrants.
When	Construction will commence on April 17, 2017 with completion expected by June 2, 2017. The City of Irwindale working hours are from 7:00 am to 3:00 pm for work on eastbound lanes and 9:00 am to 5 pm on work in the westbound lanes.
Where	The new pipeline will be installed ~400' east of Sawpit Wash on Longden Ave., going east until intersection of Longden Ave. and Live Oak Ave. Work will also continue west of the Sawpit Wash to Peck Road, where existing smaller main shall be abandoned.
What to Expect	Construction crews with backhoes, dump trucks, crew trucks and hand tools will be digging along the new pipeline alignment. The services will usually be installed using an air compressor and pneumatic boring tool. The streets will generally remain open to traffic during the construction period; however there may be periodic closures. Parking may be restricted and access to driveways may be limited for short durations of time. The construction crews will make every effort to keep dust to a minimum. Please expect an increased level of noise during the construction period. Weekly activities such as trash pick-up will not be interrupted. As sections of the new main are completed crews will disinfect the main. This step is necessary to protect public health and to ensure compliance with the Waterworks Standards. Following the disinfection period, crews will flush the chlorinated water and any construction related sediment from the main. Crews will dechlorinate the water before discharge. Generally, as underground activities are completed the crews will progress to the next underground sections and come back near the end of the project to perform landscape and hardscape restoration as well as perform final street paving.
Contacts	If you have any questions or concerns about the construction activities for this project, please call the Golden State Water Company Customer Service Center at (800) 999-4033.

Golden State Water Company thanks you for your patience while we work to improve your water system.

At Golden State Water Company, it has been all about water for more than 80 years. Our team of professionals delivers reliable, quality water and great service to customers in 75 communities across California.
