

More than \$6.8 Million scheduled to be invested in Simi Valley

Golden State Water is committed to responsibly maintaining the local water infrastructure to ensure we can continue providing customers with premium water service. These investments protect the safety and reliability of the local water system.

Benefit to Customers

Below are two of the major projects planned for the Simi Valley Customer Service Area in 2022. For additional project details, please visit www.GSWater.com/Simi-Valley.

Project Name: Tapo Reservoir Improvements

Construction Summary Construction crews will provide new seismic and safety improvements, perform a recoating of interior and exterior components, and install a corrosion protection system to the existing 3.0 MG welded steel water storage tank.

Project Rational The project is required to ensure the continued reliability and quality of service to local customers by extending the service life of our existing water storage facility.

Working Hours Monday through Friday | 7 a.m. – 4 p.m.

Project Timeline January 2022 through August 2022

Project Location 2100 Tapo Street in the City of Simi Valley

Project Name: Sycamore Drive AMR Pipeline

Construction Summary Construction crews will work to install approximately 700 feet of 12-inch PVC Pipe, including a 130-foot section bored underneath the existing railroad crossing Sycamore Drive.

Project Rational The project is required to ensure the continued reliability and quality of service to local customers by abandoning existing old pipelines that are reaching the end of their useful life.

Working Hours Sunday through Friday | 10 p.m. – 6 a.m.

Anticipated Project Timeline January 2022 through March 2022

Project location City of Simi Valley's Public Right of Way and the Union Pacific Railroad's Right of Way.

Companywide, an investment of more than \$18 million to replace old meters, services, safety equipment, etc. will be made throughout GSWC service areas. This investment is critical to protect the quality and reliability of water service.

Further, we employ proactive maintenance programs and update our aging pipeline infrastructure on a replacement schedule of approximately 100 years, which is twice the national replacement average of every 200 years.

Golden State Water also remains focused on investing to modernize the customer service experience with improved online and account management resources.
