

Proactive investments in system maintenance and new infrastructure are designed to *ensure the safety and reliability of your water system.*

The rates adopted for 2025-2027 will provide customers with long-term value by investing nearly **\$12 million** in proactive capital investments and maintenance of local water infrastructure essential to the delivery and treatment of reliable, quality water.

San Gabriel Customer Service Area Capital Improvements, 2024-2026

Investments in the San Gabriel Service Area include, but are not limited to, water distribution projects, construct a new reservoir, construct a booster station and replace another booster station, construct a new well, systemwide technology to monitor and control the water system, and emergency generators needed for uninterrupted production, treatment and delivery of water in the event of power outages, natural disasters and to reduce the strain on the electrical grid, and the replacement of aging water mains. As part of our commitment to reliability and public safety, Golden State Water proactively invests in upgrading and maintaining its fire hydrants.

Our proactive investments to replace and protect your water infrastructure system:

Ensures the safety and dependability of the local water system.

Protects the environment by reducing the company's carbon footprint and its energy demands.

Upholds the fundamental right of every Californian to access safe, clean and affordable water.
